

Purchase catalogue 2021

Apple Bee 2021

The Apple Bee purchase catalogue 2021 has been specially compiled for you as a purchaser. It includes compact, clear, and useful information of each collection. All the outdoor furniture shown here, is available per container and most of the items will also be available through our warehouse in Dongen, the Netherlands.

In these strange and sometimes hectic times for many people in the outdoor industry, we want to help you as our Apple Bee dealer to make your sales as easy as possible.

In addition to sizes and weights, you will also find information about the fabrics, materials used, maintenance and much more. All the information you need to properly advise your customer!

Apple Bee can also support you if you are looking for custom made production. We would be more than happy to welcome you in our 400 m2 showroom in Dongen and talk over the possibilities. Hope to get in contact with you soon and wish you a successful season in 2021!

MATERIALS

BEE WETT® CUSHIONS

PREMIUM TECHNOLOGY

Apple Bee furniture is made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT® range consists of special weather-resistant cushions that you can simply leave outside. The removable cover is made of the best possible materials, which are all washable. As well as being waterproof, the material is also guaranteed to be UV-resistant. Unlike normal foam, the unique BEE WETT filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that your BEE WETT cushion dries incredibly quick compared to other cushions. The BEE WETT cushion is upholstered with an Olefin material that is resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The BEE WETT-line features premium technology on the cushions, which ensures that the cushions dry quickly after heavy rain. So, you can simply leave the cushions outside.

DRAIN
The open fabric structure on the bottom of the cushion drains all moisture perfectly

Care
For many years we have been supplying Apple Bee furniture together with the highest-quality, care-friendly BEE WETT® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibres and to immediately remove spilled liquids and other substances. Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a delicate fabrics programme at a maximum of 30 degrees. NB: always rinse out the covers thoroughly! In order to retain the cushions' water-repellent layer you can add a little Harmisol or similar to the last rinsing.

Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine programme is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibres will pull the cover nice and tight around the filling as it dries.

BICULAIR® WICKERWORK

Apple Bee furniture is entirely handmade. The frame is manufactured from aluminium, with no concessions made in wall thickness or finish. The welds are of first-rate quality, the screws are of high-grade steel, and the frame is anodized in a matt or high-gloss finish, or treated with color epoxy.

A unique feature of the range is that the frames are interwoven with special Biculair® wickerwork. Biculair wickerwork was originally developed for professional use. This highly durable imitation rattan fibre (HDPE) is fully weather-resistant, colorfast, recyclable and environmentally friendly. This means that the appearance and performance of the furniture is not affected by the European weather conditions and that the colors retain their natural quality, even better than real rattan! The top-class quality of this wickerwork, tested by the Netherlands Organisation for Applied Scientific Research (TNO), stands out against that of other somewhat comparable wickerwork.

LIGHT WEIGHT CONCRETE (LWC)

Light weight concrete has a core of so-called fibre reinforced cement board. In Europe and in the USA, this is also used for facade panels to decorate exterior walls because of its many advantages. It's very strong, durable, stable and it can withstand the elements water and fire. Apple Bee has chosen the same base material for its light weight concrete tops, making these tops solid, stable and -unlike other resin materials- Apple Bee LWC tops perform very well under all kinds of weather conditions. The combination of a beautiful design and this quality material ensures that Apple Bee LWC tables provide many years of enjoyment.

TEAK CARE

Apple Bee wood is Earth-friendly

Teak is the best en most valuable thing nature has to offer in terms of wood. We make our teak furniture from wood grown at the plantation forest. This is a big step forward to conserve the nature forests.

Teak contains many natural oils, which serves as a natural protective layer on the wood. Apple Bee already pre-treats all teak furniture with an anti-fungus pesticide during the production, which is designed to kill mould and mildew spores inside teak. For outdoor use, teak furniture will be exposed to rain, sunlight, dirt, moisture and fungi, and therefore taking care of outdoor furniture is important.

Apple Bee - Teak cleaner

Apple Bee Teak Cleaner is specifically designed to kill mould and mildew spores inside teak. It contains both cleaning and brightening ingredients.

Article codes
SKU: OV0010 | EAN: 8718091508382

Apple Bee - Teak color restore

Apple Bee Teak Color Restore Antique is specially developed for Apple Bee teak furniture with antique finish. After a while the antique color will fade out. The treatment protects teak and helps it retaining its natural warm color. Apple Bee Color Restore Antique generally lasts for the entire season without turning black or gray. The duration depends upon factors such as exposure to sunlight, humidity, rain, the age of the teak, and some other factors.

Article codes
SKU: OV0011 | EAN: 8718091508399

Apple Bee - Teak shield

Apple Bee Teak Shield slows the growth of algae and fungi and helps to maintain teak’s silvergrey color for a long period of time, without getting green deposits. We recommend treating teak with Apple Bee Teak Shield at least once a year. Tabletops should be treated more often, depending on the frequency of use. Extreme green deposit can occur under some conditions, such as exposure to long periods of damp. In this case, it is advisable to apply Apple Bee Teak Shield twice a year.

WARRANTY

Our garden furniture is covered by a 3 year warranty, which extends to material and manufacturing defects, under normal usage. The warranty excludes:

- Damage through use;
- Scratches;
- Stacking damage;
- Loosening / detachment of plaited strands;
- Fine cracks in wood;
- Turning grey / discoloration of wood;
- Standard cushions.

Defects that are the result of incorrect or improper use (for example: abnormal loads, damage from aggressive substances, incorrect assembly or maintenance, repairs by non-experts, etc.) are also excluded. This warranty does not entitle the purchaser to compensation. Any claims or warranty should be made through the supplier, on presentation of the sales receipt. For more information and practical tips on the warranty and maintenance, visit www.applebee.nl or email: service@applebee.nl.

What's the idea?

A joint success. That is the thought behind the **shop-in-shop module(s) of Apple Bee**. It has shown that an Apple Bee shop-in-shop module increases the **turnover time** of the placed collections, and so your Apple Bee **sales** increase as well. From now on, it will be possible for all our dealers to have an Apple Bee shop-in-shop at their selling points.

You can participate in the Apple Bee shop-in-shop concept if...

- You are an Apple Bee dealer.
- You enter into a contract with Apple Bee for a minimum period of 3 years.
- You have a minimum of 4 Apple Bee collections on your shop floor and you will maintain them during the runtime of the contract.

How does it work?

In consultation with your account manager, the number of shop-in-shop modules, the execution of them, and the location in your shop will be established. The costs for the shop-in-shop concept will be billed immediately after placement. This invoice must be paid by you at that time. You will be able to at least **earn back this investment** by means of a **discount percentage** on the future Apple Bee sales realised with the collections placed on the shop floor. Apple Bee develops new collections every year. In consultation with your account manager, you can add or exchange new collections as long as the minimum number of Apple Bee collections (as agreed in the contract) is maintained on your shop floor.

Are you interested? Then please contact your Apple Bee account manager for more information!
